~~SUPERINTENDENT'S OFFICE~~,

October 14th, 1884.

Hon. A. L. Snowden
Superintendent
Sir.

The introduction of the Germicide into five of the water Closets in the basement, has had a marked Effect, in sweetening the air, in and around the Rooms, it has been remarked by those using the Closets, that the Germicide has produced better results, than any disinfectant heretofore used.

I would respectfully suggest that they be allowed to remain for six months, so that a test may be given during the cold weather, when free ingress of air from without is cut off; by the closing of doors, and windows, The total Cost for the six months would be $39.00

Respectfully.
Jamd James Foreman

Hon. A.L. Snowden
Superintendent

Sir:

The introduction of the Germicide into five of the water closets in the basement, has had a marked effect, in sweetening the air, in and around the same, it has been remarked by those using the closets, that the Germicide has produced better results, than any disinfectant heretofore used.

I would respectfully suggest that they be allowed to remain for six months, so that a test may be given during the cold weather, when free ingress of air from without is cut off; by the closing of doors, and windows. The total cost for the six months would be $39.00.

Respectfully,
Saml. James
